

VAIBHAV MAHAJAN

Senior Platform & DevOps Engineer

San Francisco | 857-693-9723 | i.vaibhavamahajan@gmail.com | [linkedin.com/in/vbhv/](https://www.linkedin.com/in/vbhv/) | github.com/vbhv10/ | vaibhavamahajan.me

PROFESSIONAL SUMMARY

Platform engineer who turns manual, error-prone operations into self-service golden paths. **4+ years** on AWS and Kubernetes at scale, currently running the **GitOps delivery platform used by 50+ engineers** across a multi-account SaaS product. Deep in Terraform/IaC, ArgoCD + Kargo, and HashiCorp Vault, including a zero-downtime migration. **Certified Kubernetes Administrator (CKA)**.

TECHNICAL SKILLS

AWS: EKS, EC2, Lambda, VPC, RDS, S3, KMS, IAM, Firehose, SQS, SNS, ElastiCache, WAF, ECR, Secrets Manager, CloudWatch

IaC & Provisioning: Terraform, Terraform Cloud, Packer, Crossplane, Cloud Formation/SAM

Multi-Cloud: Azure (AKS), GCP (GKE, Cloud Functions, Pub/Sub, Cloud Run, BigQuery), HCP (Vault Dedicated)

Kubernetes & GitOps: Kubernetes, EKS/AKS/GKE, ArgoCD, Kargo, Kustomize, Helm, Kyverno, Istio

Security & Identity: HashiCorp Vault, VSO, SOPS, KMS, Workload Identity Federation, Okta SSO, Keycloak, OIDC/JWT

CI/CD & Release: GitHub Actions, Jenkins, GitLab CI, install4j, Trivy, semantic versioning

Languages: Python (FastAPI/Django), Go, Bash, Groovy, SQL

Data & Observability: Airflow, DBT, Kafka, Datadog, Grafana, ELK; PostgreSQL, MongoDB, DynamoDB, Redis

PROFESSIONAL EXPERIENCE

DevOps Engineer | Centric Software | California, USA (Remote)

May 2024 - Present

- Built a **self-service GitOps delivery platform** on **ArgoCD** and **Kargo**, automating dev → qa → preprod → prod promotions adopted by **50+ engineers org-wide** to ship independently
- Designed and operated multi-account AWS infrastructure for a SaaS PLM product across **21+ AWS accounts and 4 domains**, codified in **47 reusable Terraform modules** and ArgoCD ApplicationSets templates that cut new-environment provisioning from **weeks to a single day** and eliminated config drift
- Designed **HCP Vault Dedicated** Terraform module (JWT/OIDC for private EKS, DR replication, Secrets Sync to Secrets Manager via Workload Identity Federation) and led a **zero-downtime migration** onto it, eliminating static credentials across all accounts
- Operate **25+ platform components** on **Amazon EKS** (Istio, Keycloak, cert-manager, Kyverno, VSO) via **Helm/ALB** and ran **fleet-wide upgrades (1.33 → 1.35)** with custom readiness tooling that cut upgrade time and risk
- Built **event-driven, serverless services (AWS SAM/Lambda)**; also provisioned AKS on Azure and automated a multi-database installer pipeline (install4j + Jenkins)
- Reduced operational overhead **90%** via Helm charts and a deployment CLI; **mentor engineers** and review infrastructure PRs, and **own cloud and IaC standards** via Terraform module conventions and **architecture decision records**

DevOps Engineer | Deqode | Indore, India

Nov 2021 - Aug 2022

- Designed a modern data stack that cut cloud resource use **3x**, with a custom **Python** connector for **Airbyte** feeding BigQuery and **Apache Airflow** orchestration (20 DAGs).
- Transformed 6M+ records with **DBT** and deployed 5 subprojects on **Kubernetes (GKE)** using **Terraform, Helm, and GitLab CI**, securing credentials with HashiCorp Vault.
- Built serverless ETL with **GCP Cloud Functions, Pub/Sub, Cloud Scheduler, Firestore**, boosting responsiveness **30%** via caching.

Python / DevOps Engineer | DigiValet | Indore, India

Aug 2020 - Sept 2021

- Architected an automated server-setup and data-transfer tool (**Django, Paramiko, Celery**), cutting setup time from two days to **10 minutes** and Built the **MARS** analytics platform with **Docker, ELK, BigQuery** for 30+ enterprise hospitality clients (Encore Boston Harbor, Armani, Bvlgari, Raffles).
- Implemented a **Kong** API gateway (OAuth 2.0, load balancing) with Slack alerting, **Loki** logging, and **Grafana** dashboards; designed centralized auth/secrets with **HashiCorp Vault** and LDAP.

PROJECTS

Intelligent Control Plane (R&D) — Crossplane v2, Kubernetes, ArgoCD, Kargo, Claude AI

- Prototyped a next-gen control plane: **Crossplane v2** compositions (namespaced XRs) replacing Terraform Cloud while keeping **ArgoCD/Kargo**, with **AI-assisted (Claude) operations**.

Kubernetes DevOps Automation Suite — GKE, Go, Kafka, Terraform, Packer, Jenkins, Helm

<https://github.com/vbhv10/Kubernetes-DevOps-Automation-Suite>

- End-to-end cloud-native platform on GKE: **Kubernetes operators in Go**, Kafka-driven health checks, **Terraform + Packer** infrastructure, **Jenkins** CI/CD, and Helm deployments on a private cluster.

EDUCATION & CERTIFICATIONS

Northeastern University, Boston, MA — *MS in Information Systems*

May 2024

Rajiv Gandhi Proudhyogiki Vishwavidhyalaya, India — *BE in Computer Science Engineering*

Sept 2020

Certified Kubernetes Administrator (CKA) (2024) — <https://tinyurl.com/vbhvcka>

2024
